

Stop pumping the profits out of your plant.

Think about ITT.

Did you know that the maintenance and operation spend on pumps is higher than for any other rotating machine? In fact, over 60% of a pump's total life cycle cost is from maintenance, energy and downtime. ITT ProActivitySM can put you in control of the variable costs. Our application experts will survey your total fluid system, create detailed recommendations and implement needed changes. Typically, ProActivity can return savings of up to 25% annually. Reduce your total cost of pump ownership, optimize your plant, and protect your profits.
